

Electronic Medical Record Save the date!

Go-Live One

We're getting closer to rolling out the Electronic Medical Record, with Go-Live One starting at Dandenong and Cranbourne from Tuesday 20 August.

We've staggered our Go-Live to ensure the transition is a success, and to ensure you have the resources and support you need.

During Go-Live, our Clinical Transition Teams will work across the wards to transcribe patient records from paper into the EMR. For more information about this process, visit www.EMRMonashHealth.org and stay tuned for further updates.
