

Paediatric MET Clayton, Casey, Dandenong

Paediatric MET usually involves a continuum of the care staff have already been delivering:

- taking and recording observations
- respiratory support
- placing IV, giving medications, taking bloods
- comforting infants and children

Therefore, at a MET staff will don the same Tier of PPE that was appropriate for patient care leading up to the MET call.

* During periods of high transmission, all inpatient wards to have silver trolley (or equivalent) with Tier 3 (N95 mask; gloves; shield; gown) in each pod of beds
