

Deteriorating Patient Training

Melissa Bonaddio - Deputy Director NaMES
Agnetha Clarke – Deteriorating Patient Coordinator

What do you need to do?

- One of the six courses
 - Adult Basic Life Support
 - Paediatric Basic Life Support
 - Adult Advanced Life Support
 - Paediatric Advanced Life Support
 - Neonatal First Response (NeoResus)
 - Neonatal Advanced (NeoResus)
- Online only completion required to meet training needs for all courses (except Neonatal First Response and Advanced (NeoResus)) until **May 31st 2021**

Who needs to complete what?

- All **clinical patient facing staff** as per the Mandatory and Targeted Training Procedure
- The table represents the minimum organisational requirements and local requirements may be in place
- Face to face training is still being conducted for priority groups including graduate nurses / medical interns / new staff with additional infection prevention measures in place

Mandatory & Targeted Training

Procedure

Table 3A: BLS + ALS for employees caring for adults	Adult BLS practical (annual)	Adult BLS online (annual)	Adult ALS online & practical (annual)	Adult ALS online (3 yearly)

Have you completed your deteriorating patient training?

[Log in to Latte and complete your training now!](#)

- Scan the QR Code or visit learning.monashhealth.org and log in to Latte
- Search for “deteriorating patient” and open the training module specific to your area/speciality
- Remember to reset completion before you re-complete the course (scroll down and hit the “Reset Completion” button)
- Complete your Deteriorating Patient training module (you can pause and return to your training module if required)

Completion of the online component of your deteriorating patient training (excluding online neonatal training) before May 31, 2021 will be considered as full completion of the course.

Monash Health

How to access the training?

- **Latte**

- all 6 courses have been tagged to come up with multiple search options
eg: deteriorating patient, det pt, BLS, ALS

- Return to face to face training is being planned in conjunction with infection prevention

Reset completion

- If the reset course completion button appears – you need to click this
- This needs to be activated to ensure that the new date of completion is recorded
- If this button does not appear that means that your annual completion date is within 60 days and that you need to renew your training

*Remember to
reset before
you re-complete*

RESET COMPLETION

DEMO: Latte course access and reset completion

- How to get into Latte
- How to access the Deteriorating Patient training courses
- Using the reset completion button to register new completion date

How long to complete?

- Currently online only completion for Adult and Paediatric BLS and ALS required
- These courses can be completed at any time that suits you!
- Approximate time to complete
 - Adult BLS – 15 min
 - Adult ALS – 45 min
 - Paediatric BLS – 20 min
 - Paediatric ALS – 45 min
- NeoResus both basic and advanced still have a face-to-face component that requires completion for training to be registered

Return to face – to – face training?

- We are working with Infection Prevention regarding the recommencement of face-to-face training for everyone
- We are in the process of developing the resources to help facilitate the return to face – to – face training
- Further information and training to be coming your way soon!
